**Practice Word Problems: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 9)** Cleo Borac, Silviu Borac

**About “Competitive Mathematics for Gifted Students”** This series provides practice materials and short theory reminders for students who aim to excel at problem solving. Material is introduced in a structured manner: each new concept is followed by a problem set that explores the content in detail. Each book ends with a problem set that reviews both concepts presented in the current volume and related topics from previous volumes. The series forms a learning continuum that explores strategies specific to competitive mathematics in depth and breadth. Full solutions explain both reasoning and execution. Often, several solutions are contrasted. The problem selection emphasizes comprehension, critical thinking, observation, and avoiding repetitive and mechanical procedures. Ready to participate in a math competition such as MOEMS, AMC-8, Math Kangaroo in USA, or MATHCOUNTS? This series will open the doors to consistent performance.

**About Level 3** This level of the series is designed for students who can solve linear equations, are fluent with fractions, and can factor into primes. The problem sets are designed to strengthen specific areas where we know students have difficulty on AMC-8 and AMC-10. The level 3 books are a strong preparation for AMC-8 and a partial preparation for AMC-10. Level 3 consists of: Word Problems, Operations and Algebra, Arithmetic and Number Theory, and Geometry. On the contest list for this level: MATHCOUNTS, Math Kangaroo levels 5-6 and 7-8, MOEMS-M, Purple Comet, AMC-8. The computational complexity makes these problem sets useful for preparing AIME in the long run.

**About Volume 9 - Word Problems** The problem sets offer a variety of applications of fractions, decimals and percentages. Some of the most dreaded categories of problems are thoroughly represented: mixtures, rates, and problems that engage comprehension. Mixture problems are among the problems that are underrepresented in other resources while being some of the more challenging word problems on AMC-10. The computational complexity familiarizes students with AIME level problems, albeit the easier problems on AIME. The full solutions provide insight in the optimal order of operations and a thorough description of the solving strategies.

### **From reader reviews:**

#### **Margaret Gentile:**

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their leisure time with their family, or their own friends. Usually they accomplishing activity like watching television, likely to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book may be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the book untitled Practice Word Problems: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 9) can be great book to read. May be it is usually best activity to you.

#### **Treva Ritter:**

The reason why? Because this Practice Word Problems: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 9) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will surprise you with the secret it inside. Reading this book next to it was fantastic author who write the book in such remarkable way makes the content within easier to understand, entertaining method but still convey the meaning fully. So , it is good for you for not hesitating having this any longer or you going to regret it. This book will give you a lot of advantages than the other book get such as help improving your skill and your critical thinking method. So , still want to delay having that book? If I ended up you I will go to the book store hurriedly.

#### **Sanjuana Day:**

Reading a book to be new life style in this year; every people loves to study a book. When you examine a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, due to the fact book has a lot of information in it. The information that you will get depend on what types of book that you have read. If you need to get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, and also soon. The Practice Word Problems: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 9) will give you a new experience in examining a book.

#### **Juan Dishon:**

You may spend your free time to read this book this publication. This Practice Word Problems: Level 3 (ages 11-13) (Competitive Mathematics for Gifted Students) (Volume 9) is simple to develop you can read it in the recreation area, in the beach, train and also soon. If you did not have got much space to bring the printed book, you can buy the particular e-book. It is make you simpler to read it. You can save the actual book in your smart phone. So there are a lot of benefits that you will get when one buys this book.
