*Decolonizing Time: Work, Leisure, and Freedom* demonstrates the importance of time as a central category for political theory. The historical struggle over the control of time is of analytical, moral, and practical significance, such that any project aiming to establish a meaningful relationship between freedom and equality must begin by reconceptualizing time. Whereas the labor movement's original fight for time sought to limit the length of the working day, the fight for time today must address the new realities of the colonization of time, which increasingly extends beyond work to free time and leisure. *Decolonizing Time* reconsiders discretionary time as a measure of freedom through the concept of temporal autonomy as developed through the Aristotelian-Marxist, critical, and feminist theory traditions.
