## **Materials, Third Edition: engineering, science, processing and design; North American Edition**

Michael F. Ashby, Hugh Shercliff, David Cebon

This is the essential materials engineering text and resource for students developing skills and understanding of materials properties and selection for engineering applications. Taking a unique design-led approach that is broader in scope than other texts, Materials 3e meets the curriculum needs of a wide variety of courses in the materials and design field, including introduction to materials science and engineering, engineering materials, materials selection and processing, and materials in design. This new edition retains its design-led focus and strong emphasis on visual communication while expanding its inclusion of the underlying science of materials to fully meet the needs of instructors teaching an introductory course in materials.

- Design-led approach motivates and engages students in the study of materials science and engineering through real-life case studies and illustrative applications
- Highly visual full color graphics facilitate understanding of materials concepts and properties
- Chapters on materials selection and design are integrated with chapters on materials fundamentals, enabling students to see how specific fundamentals can be important to the design process
- For instructors, a solutions manual, lecture slides, online image bank and materials selection charts for use in class handouts or lecture presentations are available at <http://textbooks.elsevier.com>
- Links with the Cambridge Engineering Selector (CES EduPack), the powerful materials selection software. See [www.grantadesign.com](http://www.grantadesign.com) for information

### **NEW TO THIS EDITION:**

- Text and figures and been revised and updated throughout
- The number of worked examples has been increased by 50%
- The number of standard end-of-chapter exercises in the text has been doubled
- Coverage of materials and the environment has been updated with a new section on Sustainability and Sustainable Technology

**From reader reviews:**

**Clara Lee:**

The book Materials, Third Edition: engineering, science, processing and design; North American Edition can give more knowledge and information about everything you want. Why must we leave a good thing like a book Materials, Third Edition: engineering, science, processing and design; North American Edition? A few of you have a different opinion about e-book. But one aim this book can give many info for us. It is absolutely correct. Right now, try to closer together with your book. Knowledge or data that you take for that, you are able to give for each other; you could share all of these. Book Materials, Third Edition: engineering, science, processing and design; North American Edition has simple shape however you know: it has great and massive function for you. You can seem the enormous world by available and read a reserve. So it is very wonderful.

**Sharon Novick:**

Reading a reserve tends to be new life style in this era globalization. With studying you can get a lot of information that could give you benefit in your life. The authors on this planet always try to improve their ability in writing, they also doing some investigation before they write with their book. One of them is this Materials, Third Edition: engineering, science, processing and design; North American Edition.

**Derrick Tompkins:**

Don't be worry for anyone who is afraid that this book can filled the space in your house, you will get it in e-book means, more simple and reachable. This Materials, Third Edition: engineering, science, processing and design; North American Edition can give you a lot of pals because by you taking a look at this one book you have matter that they don't and make you actually more like an interesting person. That book can be one of a step for you to get success. This e-book offer you information that maybe your friend doesn't realize, by knowing more than some other make you to be great men and women. So , why hesitate? Let's have Materials, Third Edition: engineering, science, processing and design; North American Edition.

**Chris Wolf:**

As a university student exactly feel bored to help reading. If their teacher asked them to go to the library or even make summary for some e-book, they are complained. Just very little students that has reading's internal or real their hobby. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading critically.
