Guide to Modeling and Simulation of Systems of Systems (Simulation Foundations, Methods and Applications) Bernard P. Zeigler, Hessam S. Sarjoughian

This guide demonstrates how virtual build and test can be supported by the Discrete Event Systems Specification (DEVS) simulation modeling formalism, and the System Entity Structure (SES) simulation model ontology. The book examines a wide variety of Systems of Systems (SoS) problems, ranging from cloud computing systems to biological systems in agricultural food crops. Features: includes numerous exercises, examples and case studies throughout the text; presents a step-by-step introduction to DEVS concepts, encouraging hands-on practice to building sophisticated SoS models; illustrates virtual build and test for a variety of SoS applications using both commercial and open source DEVS simulation environments; introduces an approach based on activity concepts intrinsic to DEVS-based system design, that integrates both energy and information processing requirements; describes co-design modeling concepts and methods to capture separate and integrated software and hardware systems.

From reader reviews:

Tim Simmons:

As people who live in the actual modest era should be revise about what going on or facts even knowledge to make these keep up with the era that is certainly always change and make progress. Some of you maybe can update themselves by looking at books. It is a good choice for yourself but the problems coming to you is you don't know which one you should start with. This Guide to Modeling and Simulation of Systems of Systems (Simulation Foundations, Methods and Applications) is our recommendation so you keep up with the world. Why, because book serves what you want and wish in this era.

Deana Broom:

Nowadays reading books become more than want or need but also become a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge even the information inside the book in which improve your knowledge and information. The info you get based on what kind of book you read, if you want have more knowledge just go with education and learning books but if you want truly feel happy read one along with theme for entertaining for instance comic or novel. The particular Guide to Modeling and Simulation of Systems of Systems (Simulation Foundations, Methods and Applications) is kind of reserve which is giving the reader unforeseen experience.

Joshua McIntosh:

Reading a book to be new life style in this 12 months; every people loves to read a book. When you examine a book you can get a great deal of benefit. When you read publications, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, these us novel, comics, as well as soon. The Guide to Modeling and Simulation of Systems of Systems (Simulation Foundations, Methods and Applications) will give you a new experience in reading through a book.

Ronald Stauffer:

Beside that Guide to Modeling and Simulation of Systems of Systems (Simulation Foundations, Methods and Applications) in your phone, it may give you a way to get nearer to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from oven so don't possibly be worry if you feel like an previous people live in narrow town. It is good thing to have Guide to Modeling and Simulation of Systems of Systems (Simulation Foundations, Methods and Applications) because this book offers to you readable information. Do you sometimes have book but you rarely get what it's exactly about. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable option here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss that? Find this book in addition to read it from right now!
