Mathematical Statistics with Mathematica (Springer Texts in Statistics)

Colin Rose, Murray D. Smith

Mathematical Statistics with Mathematica (Springer Texts in Statistics) Colin Rose, Murray D. Smith
This book and software package presents a unified approach for doing mathematical statistics with Mathematica. The mathStatica software empowers the student with the ability to solve difficult problems. The professional statistician will be able to tackle tricky multivariate distributions, generating functions, inversion theorems, symbolic maximum likelihood estimation, unbiased estimation, and the checking and correcting of textbook formulae. This is the ideal companion for researchers and students in statistics, econometrics, engineering, physics, psychometrics, economics, finance, biometrics, and the social sciences. The mathStatica CD-ROM includes: mathStatica: The Applications Pack for mathematical statistics, custom Mathematica palettes, live interactive book that is identical to the printed text, online help, trail version of Mathematica 4.0. Colin Rose is Director of the Theoretical Research Institute (Sydney). He has published in leading journals on computer algebra systems and their applications to statistics, economics, and finance. Murry Smith is a senior lecturer in the Department of Econometrics and Business Statistics at the University of Sydney. In 1998-99, he was awarded an Alexander von Humboldt Research Fellowship to visit the University of Munich. He publishes in the fields of statistics, econometric theory, and computer algebra systems. WINNER of The MDTech Prize for Best Software Contribution at COMPSTAT 2002!

From reader reviews:

Harold Hutchison:

Do you have favorite book? Should you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each e-book has different aim or maybe goal; it means that e-book has different type. Some people sense enjoy to spend their time to read a book. They can be reading whatever they get because their hobby is actually reading a book. What about the person who don't like examining a book? Sometime, person feel need book once they found difficult problem or perhaps exercise. Well, probably you'll have this Mathematical Statistics with Mathematica (Springer Texts in Statistics).

Helen Arnold:

Do you have something that you enjoy such as book? The e-book lovers usually prefer to opt for book like comic, quick story and the biggest you are novel. Now, why not trying Mathematical Statistics with Mathematica (Springer Texts in Statistics) that give your entertainment preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the means for people to know world considerably better then how they react when it comes to the world. It can't be claimed constantly that reading routine only for the geeky person but for all of you who wants to become success person. So , for every you who want to start examining as your good habit, you can pick Mathematical Statistics with Mathematica (Springer Texts in Statistics) become your starter.

Albert Chesson:

Do you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try and pick one book that you never know the inside because don't assess book by its protect may doesn't work is difficult job because you are scared that the inside maybe not while fantastic as in the outside seem likes. Maybe you answer could be Mathematical Statistics with Mathematica (Springer Texts in Statistics) why because the excellent cover that make you consider concerning the content will not disappoint a person. The inside or content is actually fantastic as the outside or cover. Your reading 6th sense will directly show you to pick up this book.

Brandon Phelan:

You may get this Mathematical Statistics with Mathematica (Springer Texts in Statistics) by go to the bookstore or Mall. Just simply viewing or reviewing it may to be your solve trouble if you get difficulties to your knowledge. Kinds of this reserve are various. Not only simply by written or printed but in addition can you enjoy this book through e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your guide. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose correct ways for you.
