## Neoplastic Diseases of the Blood

In this fourth edition of the classic work on malignant blood cancers, the team of editors and over 100 international leaders in the field provide a comprehensive text on the diagnosis and treatment of all hematologic malignancies, both common and rare. This extensively revised and updated edition reflects the tremendous progress in the science and treatment of hematologic malignancies during the eight years since the third edition. Revisions and new chapters include coverage of stem cell transplantation, molecular genetics, monoclonal antibodies, and new treatment modalities.
