# Measurement and Assessment in Education (2nd Edition)

*Cecil R. Reynolds, Ronald B. Livingston, Victor Willson*

**Measurement and Assessment in Education (2nd Edition)** Cecil R. Reynolds, Ronald B. Livingston, Victor Willson

**This text employs a pragmatic approach to the study of educational tests and measurement so that teachers will understand essential psychometric concepts and be able to apply them in the classroom.**

The principles that guide the development of this text are:

- (1) What essential knowledge and skills do classroom teachers need to conduct student assessments in a professional manner?
- (2) What does the research on educational assessment tell us? This focus has resulted in a uniquely approachable and technically accurate presentation of the material.

While providing a slightly more technical presentation of measurement and assessment than more basic texts, this text is both approachable and comprehensive. The text includes a gentle introduction to the basic mathematics of measurement, and expands traditional coverage to include a thorough discussion of performance and portfolio assessments, a complete presentation of assessment accommodations for students with disabilities, and a practical discussion of professional best practices in educational measurement.
