## **Corporate Responsibility and Sustainable Development: Exploring the nexus of private and public interests (Routledge Research in Sustainability and Business)**

Corporate responsibility and sustainable development are two concepts that may be able to reconcile many of the big challenges facing the world; challenges such as tensions between respect for the natural environment, social justice, and economic development; the long view versus short-term imperatives and the competing priorities between developed and developing economies.

This book explores the gaps and overlaps between corporate responsibility and sustainable development. These concerns overlap because they implicate corporate practices, state development policy challenges, the concerns and priorities of non-governmental organisations, and the potential for innovative forms of organisation to address these challenges. This collection examines these questions in terms of tensions and interdependencies, between competing claims to resources, rights and responsibilities, strategy and governance, between public and private interest, and the implications for equity and the common good over the long term.

This is a valuable resource for researchers, lecturers, practitioners, postgraduate and final year undergraduates in business strategy, international business and international management, public sector policy and management, international development, political economy. It is also suitable for more specialist courses on sustainability, corporate responsibility, governance and international development.
