## The International Yearbook of Environmental and Resource Economics 2002/2003: A Survey of Current Issues (New Horizons in Environmental Economics)

This annual publication provides a survey of research on environmental and resource economics in 2002/2003 by experts in the field. It includes topics such as: climate change policy; general equilibrium models in environmental and resource economics; hedonic property value techniques for policy and litigation; progress and problems in the economics of sustainability; valuing the health effects of pollution; the economics of carbon sequestration in agricultural soils; tradable permits for air quality; and linking environmental ethics and environmental policy.
