Michael Ainslie

Principles of Sonar Performance Modelling (Springer Praxis Books) Michael Ainslie

Sonar performance modelling (SPM) is concerned with the prediction of quantitative measures of sonar performance, such as probability of detection. It is a multi-disciplinary subject, requiring knowledge and expertise in the disparate fields of underwater acoustics, acoustical oceanography, sonar signal processing and statistical detection theory. No books have been published on this subject, however, since the 3rd edition of Urick's classic work 25 years ago and so Dr Ainslie's book will fill a much-needed gap in the market. Currently, up-to-date information can only be found, in different forms and often with conflicting information, in various journals, conference and textbook publications.

Dr Michael Ainslie is eminently qualified to write this unique book. He has worked on sonar performance modeling problems since 1983. He has written many peer reviewed research articles and conference papers related to sonar performance modeling, making contributions in the fields of sound propagation and detection theory.

From reader reviews:

Roy Myers:

What do you with regards to book? It is not important to you? Or just adding material when you require something to explain what your own problem? How about your spare time? Or are you busy man? If you don't have spare time to do others business, it is make one feel bored faster. And you have extra time? What did you do? All people has many questions above. They should answer that question mainly because just their can do this. It said that about guide. Book is familiar on every person. Yes, it is correct. Because start from on guardería until university need this Principles of Sonar Performance Modelling (Springer Praxis Books) to read.

Millicent Doty:

People live in this new time of lifestyle always try to and must have the spare time or they will get lots of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely indeed. People is human not only a robot. Then we inquire again, what kind of activity do you possess when the spare time coming to a person of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative inside spending your spare time, typically the book you have read is actually Principles of Sonar Performance Modelling (Springer Praxis Books).

James Hudson:

As a college student exactly feel bored for you to reading. If their teacher expected them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's spirit or real their passion. They just do what the instructor want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that studying is not important, boring as well as can't see colorful images on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Principles of Sonar Performance Modelling (Springer Praxis Books) can make you experience more interested to read.

Soledad Neeley:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is published or printed or highlighted from each source which filled update of news. With this modern era like at this point, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just in search of the Principles of Sonar Performance Modelling (Springer Praxis Books) when you needed it?
