A Course in Ordinary Differential Equations

B. Rai, D.P. Choudhury, H. I. Freedman

A Course in Ordinary Differential Equations

B. Rai, D.P. Choudhury, H. I. Freedman

A Course in Ordinary Differential Equations B. Rai, D.P. Choudhury, H. I. Freedman
This text book for the undergraduate and postgraduate courses presupposes no background other than elementary calculus. The novel features of the book are: systematic method of finding integrating factors of the first order equations; unified treatment of several categories of equations under the banner of Linerarly Separable equations; rational approach to Singular Solutions; sound treatment of inverse operator method for obtaining particular solutions of non-homogeneous linear equations; technique of solving systems of linear equations with constant coefficients equivalent to the use of Jordan Canonical form of the associated matrix. Theoretically sound approach to the method of Laplace transforms; elaboration of properties of Legendre and Bessel functions and inclusion of all the major numerical techniques for solving differential equations along with a derivation of the Runge Kutta formula; and additional exercises with answers. All the methods given in the book are explained by the help of solved examples. It is an adequate number of unsolved exercises have also been provided on each topic.

From reader reviews:

Araceli Burns:

The book A Course in Ordinary Differential Equations give you a sense of feeling enjoy for your spare time. You can utilize to make your capable much more increase. Book can to be your best friend when you getting anxiety or having big problem using your subject. If you can make looking at a book A Course in Ordinary Differential Equations to become your habit, you can get a lot more advantages, like add your current capable, increase your knowledge about several or all subjects. You are able to know everything if you like start and read a guide A Course in Ordinary Differential Equations. Kinds of book are a lot of. It means that, science e-book or encyclopedia or other individuals. So , how do you think about this reserve?

Jennifer Darby:

What do you think of book? It is just for students because they are still students or the item for all people in the world, what best subject for that? Just simply you can be answered for that concern above. Every person has different personality and hobby for each other. Don't to be pushed someone or something that they don't would like do that. You must know how great in addition to important the book A Course in Ordinary Differential Equations. All type of book is it possible to see on many solutions. You can look for the internet methods or other social media.

Irma Murray:

Do you one of people who can't read enjoyable if the sentence chained within the straightway, hold on guys that aren't like that. This A Course in Ordinary Differential Equations book is readable by means of you who hate those straight word style. You will find the info here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to give to you. The writer associated with A Course in Ordinary Differential Equations content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the information but it just different available as it. So , do you nevertheless thinking A Course in Ordinary Differential Equations is not loveable to be your top collection reading book?

Gary Muldowney:

Reading a reserve make you to get more knowledge from that. You can take knowledge and information from a book. Book is written or printed or highlighted from each source which filled update of news. In this particular modern era like now, many ways to get information are available for you actually. From media social like newspaper, magazines, science publication, encyclopedia, reference book, story and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the A Course in Ordinary Differential Equations when you required it?
