**Cancer: Cures, A synergistic approach to cancer prevention and treatment (Health Science Book 2)**  
Ray Reynolds

**”Our knowledge of human biology doubles every four years.”**

This makes it nearly impossible for physicians to stay current on the latest research in their own fields let alone in all of the others that directly effect their ability to properly treat their patients.

**”In this new book by Bio Researcher Ray Reynolds you will learn...”**

- Why 85% of all oncologist who are asked state that they would never do chemotherapy themselves.
- Why you should use anti-angiogenic medications to treat your tumor instead of chemotherapy.
- Which foods shrink tumors by preventing the formation of the blood vessels that feed them.
- Which two green teas when combined are 6 times more effective at preventing cancer than separately.
- Why people who drink 4 cups of coffee each day are 40% less likely to have cancer.
- A more recent study has conclusively proven that coffee combined with exercise enables your body to destroy twice as many cancer cells as either coffee or exercise by itself.

These are just a few of the hundreds of proven cancer fighting strategies that Bio Researcher Ray Reynolds discusses in his new book “Cancer Cures, The Latest Research”. In it he provides a detailed presentation of the latest research data for preventing and treating Cancer. Instead of the usual one sided opinion favoring either mainstream or alternative care the author draws on his years of experience as a researcher to present the best of both disciplines.

If you or someone you know is currently suffering from cancer this book will provide you with the latest research data that you will need to treat it.
