Hormonal Regulation of Plant Growth and Development: Vol 1 (Advances in Agricultural Biotechnology)

Hormonal Regulation of Plant Growth and Development: Vol 1 (Advances in Agricultural Biotechnology)

Plant hormone research is the favorite topic of physiologists. Past three decades have witnessed that this subject has received much attention. The inquisitive nature of human mind has pumped much in literature on this subject and this volume is the product of such minds. In the following pages various hormonal-controlled physiological processes like, flowering, seed dormancy and germination, enzyme secretion, senescence, ion transport, fruit ripening, root growth and development, thigmomorphogenesis and thigmomonasty have been included. The volume also contains a review paper on 'Growth Regulating Activity of Penicillin in Higher Plants' and has been presented for the first time. The vast contents of each review paper have been written by erudite scholars who have admirably carried out their evangelic task to make the text up to date. This volume, I am sure, would stimulate the appetite of researchers of peripheral disciplines of botany and agricultural sciences and they will continue to enjoy the fun and adventures of plant hormone research. Save one. my most outstanding debts are due to the rich array of the contributors and other plant physiologists specially to Prof. Thomas Gaspar (Belgium), Prof. E. E. Goldschmidt (Israel), Prof. H. Greppin (Switzerland), Dr. K. Gurumurti (India), Prof. M. A. Hall (U. K.), Prof. H. Harada (Japan), Dr. M. Kaminek (Czechoslovakia), Dr. J. L. Karmoker (Bangladesh), Prof. Peter B. Kaufman (U. S. A.), Dr. V. I. Kefeli (U. S. S. R.), Dr. M. Kutaoek (Czechoslovakia), Prof. S.
