Electronic Health Records: Understanding and Using Computerized Medical Records and CD Student Software Package Richard Gartee

Electronic Health Records, a foundational course in Health Information Management or Health Information Technology programs prepares students to understand and use electronic records in a medical practice. Gartee's, first of its kind, "how to" text is designed to train future users of EHR programs, to document patient exam, diagnosis, orders, and coding. It contains screen shots, exercises and activities to provide a complete learning system. Written for everyone in the office who will touch the electronic medical record, course material is suitable for medical and nursing schools, allied health career schools, universities, community colleges and continuing education programs.

ABOUT THE SOFTWARE :

The Student CD that accompanies the book, can be networked, used for distance learning, or purchased individually or as a val pak with the book. The software does not come bound in the book. Instructors will receive a copy of the Medcin Software which is bound into the instructors manual by contacting their local representative.

The Medcin Student Edition Software may be value packed with Richard Gartee's Electronic Health Records - ISBN: 0131564862 for \$10.00 more than the price of the text or as a stand alone Student CDROM - ISBN:0131789376 available from Prentice Hall.

The software is multi-user allowing students to work simultaneously and keep work separate. Exercise print outs generated from Medcin automatically include the student's login name or ID. Medcin is the licensed core technology in many prominent EHR Systems. 10 out of 15 EHR systems for medical offices use Medcin nomenclature as the technology underlying commercial EHR systems. Students therefore are more likely to apply skills acquired in this course to an EHR application in their office.

- All work is printed and no exercises require saving.
- All exercises are designed to be completed during a normal class time.
- Printers use a standard Windows system.
- For distance learning, the software allows the student to "Print to HTML" which will output the exercise document into a file that can be emailed.

Jolene Rivera:

Many people spending their period by playing outside with friends, fun activity using family or just watching TV the whole day. You can have new activity to invest your whole day by looking at a book. Ugh, think reading a book can actually hard because you have to take the book everywhere? It fine you can have the e-book, taking everywhere you want in your Touch screen phone. Like Electronic Health Records: Understanding and Using Computerized Medical Records and CD Student Software Package which is obtaining the e-book version. So , try out this book? Let's observe.

Jennifer Stephens:

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library as well as to make summary for some guide, they are complained. Just very little students that has reading's spirit or real their pastime. They just do what the teacher want, like asked to go to the library. They go to there but nothing reading very seriously. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Electronic Health Records: Understanding and Using Computerized

Medical Records and CD Student Software Package can make you feel more interested to read.
